

GRAND COULEE BASALT COLUMN

Description: Grand Coulee Basalt Columns are quarried in Washington State. These columns are the classic brown rust color associated with basalt from Washington State. They are ideal for use in custom monuments, water features, and public use projects. Available uncored as placement pieces or drilled for water features.

Color: Tans, rusty browns, and reds make up the coloration of the exterior crust, while the interior is a dark, charcoal grey and can be polished to a black luster.

Diameter: 18" to 24"

Height: 2' up to 25'

Weight: ~250 – 650 lbs per linear foot
